Synopsis

This superbly illustrated, practical textbook explains how to plan a position for the jaws and teeth to optimize the facial profile for each patient. Written by an internationally-respected author team, this authoritative resource also provides coverage of a new approach to facial planning that could soon become the standard method for orthodontists and oral surgeons. Content explains how to plan a position for the jaws and teeth in order to optimize the facial profile for each individual. Challenging borderline cases are discussed, so readers can better determine what is or isn’t a surgical case. A new approach to facial planning is covered. Illustrated case histories demonstrate the clinical success of methods.
