Illustrated Guide To Aesthetic Botulinum Toxin Injections: Dosage, Localization, Uses (Aesthetic Methods For Skin Rejuvenation)

Synopsis

Written by internationally renowned specialists, this book provides a practical step-by-step guide to aesthetic botulinum toxin A injections in the face, including treatment of the forehead, glabella, brow, lower eyelid, bunny lines, marionette lines, nasolabial folds, cheeks, gummy smile, upper and lower lip, chin, neckline, and décolletage. Each aesthetic procedure is described in full from the patient examination through the suggested treatment protocol and is supplemented with procedural checklists. Detailed anatomical illustrations and photos highlight the pertinent muscles in each region as well as the target structures for injection, and case reports reveal the tips, pitfalls, and combination possibilities for each treatment. A must-have, hands-on reference for all dermatologists, plastic surgeons, ENT specialists, and physicians dealing with aesthetic skin rejuvenation.

Customer Reviews

Excellent illustrations. The blended images of the patient's face and underlying anatomy help enormously with one's understanding as do the anatomical cross section illustrations. The text is useful as a manual for any new injector. As a full time cosmetic medicine doctor for the past 7 years I still found a great deal of useful information on some of the less commonly taught indications for botulinum toxin. Highly recommended for any clinician doing aesthetic injection treatments.
