Human Anatomy & Physiology Laboratory Manual, Main Version, 10th Edition

Synopsis

Featuring extensive new instructor support materials for easier quizzing in the lab, this best-selling laboratory manual provides a wide variety of exercises and activities designed to meet the needs of any 2-semester anatomy & physiology laboratory course. Known for its thorough, clearly-written exercises, full-color art, and integrated tear-out review sheets, this lab manual gives students a complete hands-on laboratory and learning experience inside and outside of the lab. The new edition has been fully revised with even more accessible language and more than 50 new and improved cadaver and histology photos. It also features engaging new Group Challenge activities that encourage a more active learning experience in the lab. Intended for use with any A&P textbook, the lab manual is available in customized editions as well as in three conventional versions: Main (Tenth Edition), Cat (Eleventh Edition), and Fetal Pig (Eleventh Edition).

Book Information

Spiral-bound: 928 pages

Publisher: Pearson; 10 edition (February 14, 2013)

Language: English

ISBN-10: 0321827511

ISBN-13: 978-0321827517

Product Dimensions: 9.3 x 1.3 x 10.7 inches

Shipping Weight: 3.8 pounds

Average Customer Review: 4.6 out of 5 stars See all reviews (41 customer reviews)

Customer Reviews

GREAT book but the cover is on upside down. ;-) ;-) ;-)I found it humorous. Rest of the book is fine, just the front cover. Who knows, maybe it will be like the stamp that was printed upside down and be worth lots of money some day ...probably not.

Great textbook. Amazing and clear pictures. Used this for Anatomy 1 and 2. This is the lab manual but it was so good that i never bought the actual textbook for the class and just used this. Spent a hundred but saved a hundred as well. You can't write on this paper with a pencil though, it feels

really weird, like writing on wet paper. Have to use a pen.

For the price this was a good purchase. The information about the book was clear about the condition, it arrived in a timely fashion, and I had no hiccups with the transaction. Overall, a good purchase. I may not like the writing in the book, but you get what you pay for.

I'm not a fan of buying Textbooks. But buying this book was too painful. It was a lot cheaper than I've seen on other sites and different users. It was delivered within a few days. I'm very happy with my purchase.

The only thing I don't like about this lab manual is how flimsy the pages are. Each page is perforated and feels like it can rip out at any second (mostly because it can and will rip with the slightest tug). But, since I need this for class, I can't really complain.

It worked for the class but I wish it had the software. I thought I purchased a new book but it was used.

I received the notebook and on almost all the questions had answers to them. I had to erase all the answers in order to photocopy the pages to put in my lab notebook. It was time consuming.

This book came very quickly, and was just as described. Finally after 4 other tries (all from different companies/people) I have a book I can use for my class. Thank you
