Customer Reviews

I was happy to hear that the VPP Method came out. As someone who doesn't work in the stock market I really don't have the time to research and learn about all of the elements that go into buying and selling forex currently. Sashi does a great job of distilling down the core process of trading, and how software engineering works into the essentials. He explains it involves requirement gathering, then design, then implementation, testing, and further ongoing maintenance. Walking me through this process allowed me to see how thoroughly and professionally he went about creating his system. It is inspiring to see that Sashi is just another person like you or me, and isn't cut from a different cloth, despite his success in Forex. He's had to study for many years and overcome his own inner challenges like the rest of us. As a result he's been able to free up his time and accomplish many impressive goals. This gives me hope that I too can make decent money online if I just follow his proven systems and guidelines, allowing me to live the life of my dreams too. But it's not just his back story that makes me trust in his method. He provides clear charts and statistics that show his own results, and how I can get them too. His method the VPP method involves using volume, price, and pattern. He goes on to talk about what matters in Forex investment trading. Everything from finding the highest probability opportunities to proper emotional management. There's specific examples from trades he's made and his charts accurately and easily break down difficult to understand concepts, helping you to get the least draw down on your money. He has optimization reports, and back-test trade examples. Best of all he provides a link to download his free custom indicators for free.
