The entire textbook seem to be written for 5th graders. Random facts are presented with no substantiating evidence, and the same genetic statements are repeated over and over again.

The two first chapters have a theoretical approach worthy of an academy writer. But the ongoing chapters, although have useful information and practical, lack of structure.

This is a great book for anyone in the Sports and Entertainment Industry. The book is a great reference which I use daily for event security purposes.

The information in this book is priceless. It gives a good idea of some of the mishaps that might happen at events and it gives helpful tips on avoiding disasters. Very informative too.
