# Bugs In Close-Up

## Synopsis

Macro photography brings the world of bugs to life! These creatures are all around us, yet too diminutive to be observed by the human eye. The extreme photographic close-ups illustrate a hidden fauna of alien-looking critters from around the world. *Bugs In Close Up* includes assassin bugs, rhinoceros beetles, insect swarms and societies (army ants, bees and so on), inter-species relationships (ants farming caterpillars), and giants of the bug world (beetles, stick insects and the like). The incredible photography is supported by informative, extended captions detailing the subjects and, in some cases, how the images were taken. (Colin Hutton)

## Customer Reviews

Wonderful photography...stunning. BUY THIS BOOK!!!! If you do and do not like it there is nothing on this planet that will please you. BUT IT TODAY! I have no commercial interest and nothing to gain with this review. I love bugs and this what I've wanted for 51 years.

I will use the photographs for my art work. Beautiful pictures.

Excellent photos with educational comments to match

Absolutely amazing!

Spectacular
