Furniture: Furniture That Transforms Space

Synopsis

Presents a wave of designers who are applying architectural techniques to create innovative new furnishing options. Furniture is a sourcebook exploring the furnishings, interior environments, and solutions for small spaces at the meeting point between design and architecture. The book features the work of a rising generation of designers across the globe who are starting to think about furniture in an architectural way, resulting in pieces that brilliantly transform interior spaces. Boosted by digital design and new manufacturing possibilities, furniture design that morphs into a micro architecture is one of the most innovative fields of design today. Surveyed here are hundreds of examples of these objects, including bookshelves that can dynamically divide and reshape a room, chairs that create intimate room-like enclosures, and self-contained, expandable kitchen cubes. From Chicago-based firm Bureau Spectacular's Briefcase house and Japanese architect Shigeru Ban's moving boxes within rooms to Dutch designers Makkink & Bey's conversational Ear Chairs and the French atelier 37.2's series of self-standing cubes, Furniture opens the door to a world of design invention and innovation. Presented in a compact, beautifully illustrated format, this volume will be an essential resource for designers and hip consumers everywhere. 400+ color illustrations

Customer Reviews

i like it very much

As what I consider to be a hard core industrial and interior designer and architect, I found this book useful and worth purchasing. I follow this stuff closely. It is substantially typical pictorial survey and "catalogue" of mostly 21st century interior "micro-architecture" and furniture. The authors categorization of the examples represented in the book into "types" is useful and what I would consider accurate. However, if your looking for scholarship, this is not the book for you.
