The Medical Science Liaison Career Guide: How To Break Into Your First Role

Synopsis

THE MEDICAL SCIENCE LIAISON CAREER GUIDE: How to Break Into Your First Role is the ONLY Guide that teaches you what you need to do to effectively break into the highly competitive Medical Science Liaison career. This is the first published book on how to break into the MSL role and it provides a Step-by-Step guide to successfully land your first role. What makes this book unique is that it is the first published book on how to break into the Medical Science Liaison role and was written by someone who has actually been an MSL, hired MSLs, interviewed MSL, reviewed MSL CVs, and Managed MSL Teams. As a hiring manager, Dr. Samuel Dyer has seen firsthand what makes a candidate successful, and what does not. As a result of his direct experience, he developed specific techniques and effective strategies that work and are revealed in the book!

Customer Reviews

The Medical Science Liaison Career Guide: How to Break into Your First Role is the ultimate how-to guide for people looking to join this relatively young profession. Dyer's love of the MSL profession is evident just in the way he approaches this guide. This is the type of work that fulfills the mission of his organization (the MSL Society) "lifting up the profession globally" in a way that has a multiplier effect. This work is the gift that has great potential to keep on giving, influencing generations of MSLs to come, as it's squarely aimed at helping superior talent from across the health spectrum break into critical roles at life sciences companies, with the opportunity to collaborate and guide relationships with key opinion leaders at regional, national, and global levels.

He addresses PharmDs and research scientists specifically, people with his same background, who may be currently ignorant of the roles that MSLs play in bringing better health outcomes to patient populations (or even ignorant of the role's existence). Perhaps the strongest asset this guide has to offer is its thoroughness. I was immediately struck by the "stone left unturned" aspect of this work. Dyer brings his own wealth of experience as an MSL and medical affairs executive, as well as the information trove of his connection to the global medical affairs community, to bear for future generations of would-be MSLs. In addition to covering the high-level information, such as types of degrees preferred by medical affairs hiring managers to the different ways in which MSLs perform their roles at different companies (the life sciences is no monolith in this regard), Dr.
